91. Growth rates of various industries
92. Gross value of Canadian production

Introduction

These tables annually present a picture of pulp and paper operations, their intimate relationship with the forest resources and the forest crop, and their importance to the economy of Canada.

Every effort has been made to include as many 1962 figures as possible; but in many instances it has been impossible either to obtain the 1962 figures or to provide informed estimates. Particularly is this so of 1962 dollar value figures, many of which will not be available from government sources until the end of 1963.

The tables show that among all Canadian manufacturing industries, pulp and paper continues to rank first in selling value of factory shipments, value added by manufacture, salaries and wages, employment, and exports. They show, too, that pulp and paper and pulpwood account for about one in every ten freight cars loaded in Canada; and that pulp and paper mills consume slightly more than one-fifth of all the electric power consumed in Canada.

In the field of foreign trade, the tables show that during 1962, pulp and paper exports amounted to \$1,174 million. This was equivalent to 19 per cent of all Canada's domestic exports, and to 26.3 per cent of Canada's exports to the United States.

The publication of these tables has largely been made possible through the kindly aid of L. J. Pouliot, formerly chief of the Forestry Section of the Dominion Bureau of Statistics; and to him grateful acknowledgment is made.

Montreal, August, 1963

"A"—FORESTS AND PULPWOOD

Table 1. Forest Extent — 1962

	Square Miles
Total Land Area of Canada (excluding rivers and lakes)	3,560,238
NET AREA (excluding rivers and lakes)	
Forested Areas of Canada	1,713,755
All of which, save for 275,800 square miles, lies within the ten provinces.	
Forested Areas Classified as Unproductive	751,428
Small trees in adverse locations not expected to reach merchantable size.	
Productive Forest Areas	962,327
Potentially Accessible Productive Forests	242,408
Accessible Productive Forests	719,919
About half of the accessible productive forest area bears trees classified as merchantable (4 inches DBH and over); the remainder is young growth.

Table 6. Depletion and Growth, 1962

Pulp and Paper Woodlands

The pulp and paper mills lease 182,840 square miles of forest, or slightly more than 117 million acres. Over the past five years, the wood taken by the mills from this acreage has averaged 8½ million cords a year. Such a cut runs to an average of 6¼ cubic feet per acre per year to which, in order to obtain the total depletion, must be added the losses caused by fire, insects, disease, and natural mortality.

Scientific measurements all reveal that the overall growth in these leased forests exceeds the cut plus all other losses. This excess of growth serves to increase the standing volume of pulpwood which, in most instances, will render the acreage more productive and so permit larger annual harvests to meet the growing needs of the future.

Source: Woodlands Section, Canadian Pulp and Paper Association.

The National Forests

The inventory of productive forests which cover a quarter of Canada's land area, is nearing completion. Simultaneously, a large quantity of new

information relating to growth rates in the productive forests is being assembled. Preliminary estimates indicate that annual growth rates over a considerable portion of the productive forests range as high as 25 to 40 cubic feet per acre. Annual depletion on the accessible productive forests, for which it is possible to give a more accurate figure, averages about 8 cubic feet per acre, and includes cutting and losses from fire.

This is not the whole story. This seemingly favourable balance on a national scale is tempered by the following conditions:

1. The annual depletion caused by insects and disease, for which reliable estimates do not exist, is believed to exceed the losses from fire.
2. Regional examples of over-cutting in the more accessible areas indicate that control and adjustment is necessary to bring cut in line with growth potential.
3. Greater costs may be encountered in developing more remote supply areas.

a: Includes slabs and edgings, reject lumber, veneer cores and clippings formerly reported with "Other wood residue".

Source: Dominion Bureau of Statistics.

Table 12. Cords, Cubic Feet, and Board Measure

A standard cord is a stack of wood 4 x 4 x 8 feet containing 128 cubic feet of wood, bark, and interstices. A cord usually contains about 85 cubic feet of solid wood, but the content varies with the size of the logs.

In the lumber industry, wood is usually measured by the board foot. A board foot is the equivalent of a board one inch in thickness and one square foot in surface area. The relationship between board measure and cord measure varies in different sections of the Dominion. Usually, 2 cords are considered to be equivalent to about 1000 feet board measure. But this ratio also varies with the size and type of the wood.

One cord of peeled pulpwood is equivalent to 1.125 cords of rough or unpeeled wood.

Source: Department of Forestry.

"B"—FROM WOOD TO MARKETS

This section contains a summary of the industry's operation relating production and markets to the pulpwood harvest.

Table 13. Pulpwood Supply, 1961

	Cords (a)	Value (b)
Pulpwood* Production, by Provinces:		
Quebec	6,763,600	\$165,370,000
Ontario	3,599,000	101,743,000
British Columbia	2,254,685	40,652,000
Other Provinces	2,856,981	61,898,000
Canada	15,474,266	\$369,663,000
Pulpwood* Imports	206,726	3,562,891
Total New Supply	15,680,992	\$373,225,891
Pulpwood* Exports	1,061,048	\$ 27,156,575
Wood Used in Canadian Mills:		
Pulpwood*	14,437,456	\$365,330,191
Other Wood (c)	2,102,563	36,181,817
Total Wood Used	16,540,019	\$401,512,008

*Roundwood only, i.e. whole logs and bolts.

(a) Quantities are given in terms of rough or unpeeled wood. One cord of peeled pulpwood is equivalent to 1.125 cords of rough or unpeeled wood.

(b) Values of pulpwood production, imports, exports and consumption are not comparable, chiefly because transportation costs differ.

(c) Residual wood, such as sawmill and veneer mill chips, slabs and edgings, sawdust and butts and cores. The quantity given represents rough cord equivalents.

Source: Dominion Bureau of Statistics.

Table 14. Pulp Supply, 1961

From the 16,540,019 cords of wood used in the mills, the following pulps were manufactured in 1961:

	Tons	Value
Groundwood pulp	5,878,322	\$237,598,007
Chemical pulp	5,560,336	547,565,114
Other pulp(a)	340,507	11,127,647
Total Wood-Pulp Production	11,779,165	\$796,290,768
Wood-Pulp imports	61,748	8,404,315
	11,840,913	\$804,695,083

In addition to wood-pulp, the following fibrous materials were used in 1961 in the production of certain grades of paper and paperboard:

	Tons	Value
Rag, cotton and flax waste and sweepings, and cotton linters	12,300e	\$ 1,232,347
Old and waste paper and broke (purchased)	432,000e	14,799,607
Straw	8,300e	230,622e
Other paper stock(b)	56,000e	1,325,830e
Total Other Stock Used	508,600e	\$ 17,588,406e
Total Stock	12,349,513e	\$822,283,489e
Pulp inventories at pulp and paper mills at the beginning of the year	180,279e	19,117,681e
Total	12,529,792e	\$841,401,170e
Less pulp inventories at pulp and paper mills at the end of the year	212,528e	22,511,250e
Sold, or converted into paper, paperboard and other board	12,317,264e	\$818,889,920e

(a) Includes screenings, off-quality, semi-chemical, defibrated and exploded pulp.

(b) Includes purchased side-runs, flax fibre, fibre and leather scrap, manilla stock, etc.

e: Canadian Pulp and Paper Association estimate.

Source: Dominion Bureau of Statistics.

Table 15. Shipments by Products, 1961

From the 12,317,264 tons of pulp available for conversion or sale in 1961 the following products were manufactured and shipped:

	Tons	%	Value	%
Wood-pulp:				
To Canadian customers(a)	487,307e	4.03	n.a.	n.a.
To foreign customers(a)	2,847,828e	23.51	n.a.	n.a.
Total Wood-Pulp	3,335,135	27.54	\$ 392,654,863	24.86
Newsprint (b)	6,674,506	55.10	\$ 804,641,325	50.94
Paperboard and Other Boards:				
Paperboard	1,009,210	8.33	\$ 147,983,412	9.37
Building boards	218,800e	1.81	29,236,959	1.85
Wet machine boards	8,863	.07	1,785,042	.11
	1,236,873	10.21	\$ 179,005,413	11.33
Other Papers:				
Wrapping papers	308,942	2.55	\$ 66,780,876	4.23
Book and writing papers	416,902	3.45	112,283,129	7.11
Tissue and sanitary papers	67,716	.56	17,680,698	1.12
Building papers	65,873	.54	4,658,878	.30
Special industrial papers	6,246	.05	1,792,304	.11
	865,679	7.15	\$ 203,195,885	12.87
Total Paper and Board	8,777,058	72.46	\$1,186,842,623	75.14

Total Shipments of Pulp and Paper (c) 12,112,193 100.00 \$1,579,497,486 100.00

Converted paper products \$ 48,181,451

By-products and miscellaneous services \$ 10,302,745

Total Value of Mill Shipments \$1,637,981,682

a: Including shipments to subsidiary or affiliated companies.

b: Dominion Bureau of Statistics classification includes some grades not classed as newsprint by the Newsprint Association of Canada.

c: As much of the pulp shipped to Canadian customers and Canadian affiliated mills was utilized in the manufacture of paper and board, there is some duplication in this figure.

e: Canadian Pulp and Paper Association estimate.

Source: Dominion Bureau of Statistics.

Table 16. Wood-Pulp Use and Sale, 1961

	Pro-duction	Imports	Exports	Con-sumption by Canadian Paper Mills	Apparent Domestic Sales or Inventory Changes(a)
Tons					
Groundwood	5,878,322	69	236,022	5,628,289	14,080
Sulphite, paper grades	2,414,612	35,587	634,398	1,825,678	— 9,877
Sulphate, paper grades	2,697,016	13,267	1,634,604	1,032,139	43,540
Dissolving and Special Alpha	373,085	12,825	307,232	6,164	72,514
Screenings and others	416,130	—	56,589	382,172	—22,631
	11,779,165	61,748	2,868,845	8,874,442	97,626

* Includes Dissolving and Special Alpha.

a: Minus quantities indicate reduction of inventories.

a: For years prior to 1946, breakdown of total screenings exports into chemical and mechanical screenings estimated on basis of known quantity and value "made for export".

Other footnotes: See Table 26.

Note: Screenings were not reported separately prior to 1923. It is assumed that these were included with "Other wood-pulps". Exports of screenings prior to 1927 were probably shown with "All other manufactures of wood, n.o.p."

e: Canadian Pulp and Paper Association estimate.

f: Includes Dissolving and Special Alpha (Sulphite and Sulphate).

Note: Prior to 1952 transfers of own pulp from one mill to another were reported as purchases by the consuming mills and as sales by the producing mills.

Capacity is shown as at the beginning of each year plus allowances for new machines from the date they are expected to operate. It is possible for production to exceed capacity partly because no allowance is made for improvements in equipment during the year.

Table 40. Daily Capacity and Production

Tons	Number of Work Days	Capacity Per Day	Production Per Day
1935	310	13,752	9,945
1936	310	13,606	11,405
1937	309	13,627	12,938
1938	309	14,676	9,362
1939	308	15,042	10,307
1940	310	15,213	12,161
1941	309	15,219	12,203
1942	309	15,415	11,180
1943	309	15,139	10,417
1944	309	15,296	10,565
1945	309	15,120	11,624
1946	308	15,068	14,630
1947	308	15,353	15,650
1948	309	15,803	16,126
1949	308	16,601	16,806
1950	307	17,025	17,194
1951	308	17,402	17,910
1952	309	17,833	18,405
1953	308	18,580	18,576
1954	311	19,030	19,306
1955	310	19,559	19,963
1956	310	20,115	20,890
1957	311	21,701	20,614
1958	312	23,175	19,559
1959	311	24,162	20,545
1960	313	24,339	21,544
1961	315	24,559	21,408
1962	323	24,712	20,745

Because of variations in the number of workdays, daily capacity provides the most accurate measurement of changes in capacity.

1961	2,376,000	2,003,901	1,964,825	121,550	2,086,375
1962	2,471,000	2,153,579	2,085,881	76,143	2,162,024

These figures are compiled from U.S. mill reports and shipments to overseas show only exports direct from mills. They do not include tonnage delivered to U.S. buyers and subsequently resold for export, such tonnage being included in shipments to U.S.A. Exports as reported by U.S. Department of Commerce are thus higher than mill reports; in 1962, the Department showed exports of 110,084 tons versus 76,143 tons reported by the mills.

* End of Each Year.

† U.S. total consumption is based on consumption reported by the ANPA group. For each year the percentage of total U.S. supply taken by this group is assumed to represent the percentage of total consumption consumed by the group. Total U.S. consumption is obtained by extending ANPA consumption by this percentage to 100. Total consumers' stocks at the beginning of each year plus supplies received less total consumption equals stocks at the end of the year.

ANPA: American Newspaper Publishers Association.

Source: Newsprint Association of Canada.

Source: All figures for 1913-32 and supply from Europe thereafter are compiled from U.S. Department of Commerce reports; from 1933 to date supplies from Canada and U.S. are compiled from reports to NAC and NSB respectively of mill shipments. Trade Association and government figures are not strictly comparable because of time lag between shipments and arrival dates and because of minor differences of newsprint definition.

NOTE: See notes A and B of Table 60.

(a) Groundwood Printing and Specialty Papers (containing more than 50% groundwood); Book Paper (including printing papers with 50% or less groundwood); Fine Papers; and Miscellaneous Fine Papers.

(b) Reported in Pulp and Paper industry only. Wood-pulp board used in paper-converting plants to produce laminated building boards is reported by pulp and paper mills as "Other Boxboard."

(c) Prior to 1949 some producers of wet machine board were classed in another industry, and small quantities reported in the pulp and paper industry were added with "Other Boxboards" until 1943 and with "Special Industrial Papers" since 1944.

NOTE "A": A new classification, adopted in 1944 by the Dominion Bureau of Statistics, differs from the one given above. However, for purposes of general comparison with the years 1920-43, some of the figures given in Tables 58 and 59 may be utilized. "Paperboard," "Building Boards," and "Wet Machine Boards" would approximate the "Paperboard" group given above, while "Special Industrial Papers" and "Building Papers" would approximate the "All Other" group. The "Book and Writing," and "Wrapping" groups are virtually identical in both classifications, while "Tissue and Sanitary" is nearly comparable to the "Tissue" classification given above.

NOTE "B": Some of these figures will differ somewhat from those issued by the industry itself, as DBS classifications differ at times from those of the Canadian Pulp and Paper Association.

Table 61.

Exports of Paper (Except Newsprint) — Tonnage and Value, 1960-1962

A new Export Commodity Classification was adopted by the Dominion Bureau of Statistics at the beginning of 1961. Accurate comparison between statistics for

1961 and those of earlier years is not always possible for paper and paper products especially for individual commodities, but the group totals are generally comparable.

Table 62.

Exports of Paper (Except Newsprint) — Tonnage and Value, 1951-1959

In the past, the basis and classification upon which exports of paper other than newsprint have been compiled have been modified from time to time. Consequently, only figures covering recent years are included in this and Tables 61, 63 and 64.

Moreover, because they are compiled on a somewhat different basis, the two tables which follow are not comparable to the production figures in Tables 58, 59 and 60.

Also, some of the exports go through a converting plant before shipment. Thus, many of the exports have a value enhanced by the conversion or packaging process, whereas the production figures show the valuation at the basic rate.

Again, the tonnage figures for certain paper products exported are not available. The dollar figures covering these exports will be found in the following two tables, under the heading "Paper Products".

† Includes Newfoundland since 1949. In 1948, the last year before accession, Newfoundland's Gross National Product was about \$175 million.

All National Income figures from 1926 have been compiled on a revised basis in December, 1951. Figures for years prior to 1926 are not comparable.

a: The "national income" is the total of all incomes earned by Canadians in the production of goods and services during the calendar year. The "gross national product" is the market value of all goods and services produced by Canadians. It is obtained by adding to the national income two items which are not "income" but which are part of the final cost of all goods and services—namely, allowances for depreciation of plant and equipment, and indirect taxes less subsidies.

b: The "net value of production" or value added by manufacture is computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products.

The figures for the years prior to 1926, when the National Income figures were compiled on a different basis and for which the gross National product figures are not available, were as follows:

	Gross Production of Industry	Net Production of Industry	National Income
1921	\$151,003,165	\$73,765,200	\$3,507
1922	158,950,956	81,258,232	3,671
1923	184,821,511	95,076,985	3,847
1924	179,259,504	89,629,253	3,865
1925	193,092,937	99,071,212	4,239

p: preliminary.
—: Unfavourable balance.

Domestic exports cover exports of Canadian produce. In the last 20 years, domestic exports cover approximately 98 per cent or more of total Canadian exports.

Pulp and paper export figures 1919-1930 estimated by DBS from fiscal year figures.

Table 70. Capital Expenditures

For the years 1948 to 1962, annual surveys of the Department of Trade & Commerce, covering some 95 per cent of the industry, show the following capital expenditures:

Year	Millions of \$
1948	79.3
1949	71.8
1950	68.6
1951	108.9
1952	115.6
1953	91.9
1954	69.0
1955	118.3
1956	239.6
1957	234.4
1958	106.8
1959	126.6
1960	131.2
1961	123.9
1962p	125.2

1,811.1

The foregoing figures do not include capital expenditures made on the woodlands nor, of course, expenditures for maintenance and renewals.

p: preliminary.

Paper Converting Industries

	1960	1961
Number of establishments	453	444
Number of employees	29,791	29,063
Salaries and wages paid	\$114,214,419	\$115,966,105
Cost of fuel and electricity	4,845,944	5,205,743
Cost of materials used	322,995,175	341,335,076
Selling value of factory shipments	549,380,089	571,128,054

Note: These figures cover only converted paper products produced in the Folding Boxes and Set-up Boxes, Corrugated Boxes, Paper Bag, Miscellaneous Paper, and Asphalt Roofing industries. In addition, some 21 paper-mills have converting plants whose operations are included in the Pulp and Paper industry, and there are also several plants in the Printing Trades and other industries which make paper boxes and other converted paper commodities as secondary products. Factory shipments of converting plants operated by paper-mills were valued at \$48,181,451 in 1961.

1960	3,733,400,000	65,642	56,747	344,409,846
1961	3,857,300,000e	65,799	58,622	355,071,060

a: Woods labour is not included.

b: Figures on capital employed were compiled by the Dominion Bureau of Statistics from 1920 to 1943. Those for 1944 on are taken from "Taxation Statistics", published by the Department of National Revenue. The two series are not exactly comparable, the former excludes the value of inactive mills, timber limits, power developments, and investments, in wholly or partly owned subsidiaries and other enterprises. The latter includes such assets but does not cover pulp and paper mills operated by companies classed in other industries according to their principal or end product such as lumber, paper boxes, and roofing paper. For the years 1944-47 the figures cover only "profit" companies; since 1948 they cover both "profit" and "loss" companies. In 1960, the 74 pulp and paper companies covered had total assets of \$3,733,400,000 and current liabilities of \$471,500,000.

e: Canadian Pulp and Paper Association estimate.

Sources: Dominion Bureau of Statistics and Department of National Revenue.

Table 82.

Estimated Wages Paid and Numbers Employed in 1961

Wages	
Mill Workers	\$355,171,060
Woods Workers*	219,126,000
\$574,297,060	
Workers	
Seasonal woods workers on manufacturers' limits east of the Rockies	118,000
Permanent woods workers on manufacturers' limits east of the Rockies	4,200
Woods workers in B.C., mostly permanent	7,800
Woods workers cutting wood for sale to manufacturers	102,000
Mill Workers, permanent	220,000
	65,799
297,799	

* Includes an estimated \$81,300,000 to the 102,000 woods workers cutting pulpwood for sale to the mills. Includes also those working for contractors cutting pulpwood on pulp and paper company limits. The terms of pulpwood cutting contracts are of an infinite variety ranging from those in which the contractor and his men are company employees to those in which the contractor is a free agent. Some companies cut all the wood required from their own limits.

Source: Woodlands Section, Canadian Pulp and Paper Association estimate.

Table 83. Principal Expenditures 1961

Transportation(e)	\$250,000,000
Chemical & mill supplies*	196,953,139
Fuel*	55,746,891
Electricity*	60,390,784
Fibre and fibre stock*	17,588,406
Purchased pulpwood**	40,477,000
Purchased wood-waste (for pulping)*	36,181,817
Foods(e)	15,945,000
Taxes(e)	248,000,000
Paid for work done on materials supplied*	5,747,656
Wages, including woods workers**	574,297,060
	\$1,501,327,753

e: Canadian Pulp and Paper Association estimate.

* Dominion Bureau of Statistics figures.

** Expenditures for purchased pulpwood in 1961 totalled \$121,777,000 from which has been deducted \$81,300,000 covering the estimated wages paid in harvesting this wood. The latter figure is included in the \$574,297,060 shown as wages. See also Table 82.

† There is some duplication where the value of purchased pulpwood, mill supplies, fuel, chemicals, and so forth, include substantial transportation costs to the mill.

Table 84. Car Loadings

	1961 Carloads	%	1962 Carloads	%
Forest Products				
Pulp and paper	237,951	6.87	246,020	6.95

Ores and concentrates	358,738	10.36	424,775	11.99
Iron and steel: pig, bloom and ingot	8,612	0.25	9,098	0.26
Non-ferrous metals: pig, matte, ingot & manufactured products	35,170	1.01	37,603	1.06
Agricultural implements, tractors, automobiles, trucks and parts	62,031	1.79	74,607	2.11
Machinery, boilers, castings and other iron and steel products	67,846	1.96	67,996	1.92
Crude petroleum, gasoline, fuel oil and other petroleum products	273,447	7.89	279,629	7.90
Sand, gravel, stone, cement, plaster, lime, brick, tile, sewer and drain pipes, and other mineral products	350,767	10.13	354,878	10.02
	1,350,417	38.98	1,430,503	40.39
Other Products				
Sugar, canned goods, beverages	58,746	1.69	66,008	1.86
Fertilizers	44,266	1.28	47,407	1.34
Miscellaneous	415,557	12.00	453,250	12.80
	518,569	14.97	566,665	16.00
Merchandise, L.C.L.	349,062	10.08	353,581	9.98
Grand Total	3,464,123	100.00	3,541,546	100.00

Note: Car loadings of pulp and paper and pulpwood in 1962 were equivalent to 672 cars and 334 cars respectively, every day in the year. A proportion of the pulpwood car loading included pulpwood for export. Deducting an estimate for pulpwood shipped abroad, the pulp and paper industry's car loadings of pulpwood and finished products were equivalent to over seven trains of 100 cars daily. Annual loadings of pulpwood for the mills and of finished products would thus fill a train 2,311 miles in length. In addition, the pulp and paper industry creates a vast rail traffic of coal, chemicals, and other supplies required for the operations at the mills and in the woods.

Residual error of estimate	+83,082		

e: Canadian Pulp and Paper Association estimate.

p: preliminary.

Note: The power consumption of the pulp and paper mills accounts for about 35 per cent of all the power generated for the manufacturing industries. Of the power generated by industry (including mining), the pulp and paper mills accounted for 24.0 per cent in 1959, 21.5 per cent in 1960 and 23.3 per cent in 1961. Of the total consumption of electricity in Canada, the pulp and paper mills accounted for 21.3 per cent in 1959, 21.1 per cent in 1960 and about 21.1 per cent in 1961 also. There are several single paper mills which alone consume more electric power than all the domestic customers in Montreal combined, indeed which use more power than is required to provide light for the city and all its residents.

Table 92.

Gross Value of Canadian Production

	1960 '000 \$	1961 '000 \$		1960 '000 \$	1961 '000 \$
PRIMARY PRODUCTION:					
Agriculture	3,995,453	3,724,342	Primary Metal Industries	2,742,520	2,797,893p
Wheat	812,838	486,324	*Smelting and refining	1,495,178	1,462,457p
All grains (including wheat)	1,391,370	964,023	Iron and steel mills	756,456	789,271
Forestry	2,976,823	3,031,556	Metal Fabricating Industries (ex. Machinery and Transportation Industries)	1,432,905	1,405,618p
Operations in the woods	806,488	846,035	Metal stamping, pressing and coating industry	349,080	389,642
Fisheries	198,005	222,879	Fabricated structural metal industry	233,166	194,240p
Trapping	12,360	11,704	Wire and wire products manufacturers	200,112	220,701
Mining	3,515,633	3,550,978	Machinery Industries (ex. Electrical Machinery)	642,459	634,201
Mineral production	2,492,510	2,582,300	Agricultural implement industry	152,127	138,045
Electric Power	817,134	865,070	Miscellaneous machinery and equipment	393,932	385,311
Less Duplication (forest products on farms)	-48,879	-49,359	Transportation Equipment Industries	2,000,689	1,960,777
Total, Primary Production	11,466,529	11,357,169	Motor vehicle manufacturers	970,330	870,942
			Aircraft and parts manufacturers	308,190	348,245
SECONDARY PRODUCTION:			Motor vehicle parts and accessories manufacturers	286,872	352,779
Manufactures	23,747,457	24,320,017p	Railway rolling stock industry	212,077	182,569
Construction	6,886,255	6,974,379	Shipbuilding and repair	148,295	136,629
Less Duplication in Manufactures	-4,117,216	-4,116,926p	Electrical Products Industries	1,175,966	1,206,833
Total, Secondary Production	26,516,496	27,177,470p	Manufacturers of electrical industrial equipment	236,910	217,680
(See Notes below)			Communications equipment manufacturers	235,447	253,134
GRAND TOTAL	37,983,025	38,534,639p	Manufacturers of major appliances (elec. & non-elec.)	204,088	206,212
			Non-metallic Mineral Products Industries	647,462	628,676p
MANUFACTURES:			*Cement manufacturers	96,770	107,246
Paper and Allied Industries	2,128,107	2,205,734	Ready-mix concrete manufacturers	101,200	105,341p
*Pulp and paper mills	1,578,727	1,634,606	Concrete products manufacturers	107,445	111,891p
Paper box and bag manufacturers	332,921	343,076	*Clay products manufacturers (from domestic clay)	38,034	35,169
Asphalt roofing manufacturers	37,931	42,162	*Lime manufacturers	11,875	12,989
Miscellaneous paper converters	178,528	185,890	Glass products manufacturers	41,989	45,044
Wood Industries	1,068,042	1,035,340p	Petroleum and Coal Products Industries	1,197,968	1,220,194
*Sawmills (including shingle mills)	591,608	550,915p	Petroleum refining	1,148,943	1,184,176
Sash and door and planing mills (ex. hardwood flooring)	229,835	235,160	Chemical and Chemical Products Industries	1,373,467	1,433,878
*Veneer and plywood mills	135,494	143,719	Manufacturers of industrial chemicals	449,983	476,603
Furniture and Fixture Industries	347,981	362,062	Paint and varnish manufacturers	147,476	152,358
Household furniture industry	196,837	205,597	Manufacturers of soap and cleaning compounds	139,279	172,334
Printing and Publishing and Allied Industries	865,931	887,728p	Manufacturers of pharmaceuticals and medicines	164,897	166,016
Printing and bookbinding	245,848	230,145p	Plastics and synthetic resins	128,658	110,345
Printing and publishing	359,876	370,328	Textile Industries	810,523	875,288
Foods and Beverages	4,880,294	5,098,571p	Synthetic textile mills	221,937	248,718
Slaughtering and meat packing plants	1,058,440	1,080,913	Cotton yarn and cloth mills	209,503	236,711
Pasteurizing plants	401,743	411,633p	Knitting Mills	198,160	219,296
Bakeries	366,131	369,637	Clothing Industries	770,468	801,535
Fruit and vegetable canners and preservers	313,176	328,098	Women's clothing factories	268,524	277,478
Butter and cheese plants	298,889	300,000p	Men's clothing factories	261,279	279,089
Feed manufacturers	284,575	289,661	Rubber Industries	323,053	331,135
Breweries	251,501	259,438	Rubber tire and tube manufacturers	175,189	180,248
Flour mills	224,657	220,587	Leather Industries	268,114	291,069
Soft drink manufacturers	165,376	172,647	Shoe factories	160,543	173,124
Distilleries	172,309	169,208	Tobacco Products Industries	334,414	334,983
*Fish products industry	169,530	169,825p	Tobacco products manufacturers	217,888	229,956
			Miscellaneous Manufacturing Industries	538,936	589,206
			Instrument and related products manufacturers	103,375	124,829
			Plastic fabricators, n.e.s.	87,990	109,180
			Total	23,747,457	24,320,017p

*Industries included in both primary and secondary production.

p: preliminary.

Notes:

Manufactures statistics are based on the new Standard Industrial Classification adopted by the Dominion Bureau of Statistics as of 1st January 1960. Most of the major industrial groups and individual industries have also been renamed. The new definition of the establishment (reporting unit) was adopted as of 1st January 1961. Because of these changes, statistics for 1961 are not always fully comparable with those for 1960, nor those for 1960 and 1961 with those for earlier years.

Since 1952, "value of factory shipments" has replaced "gross value of products" in all manufacturing industries except sawmills, aircraft and parts manufacturers, shipbuilding and repair, railway rolling stock industry, and fabricated structural metal industry; also pulp and paper mills and veneer and plywood mills until 1956. As inventories are relatively small in the industries for which factory shipments are used, the general comparability of the figures is not seriously affected.

The gross value of products or of factory shipments given above, is limited to the annual production of commodities, and is not comparable with "gross national product" given in Table 65, which includes transportation, communication, trade, finance, and service activities. The computation is entirely different and the "gross national product" comprises, in addition, depreciation allowances, other similar business costs, and indirect taxes less subsidies.

While the statistics of gross production are of interest, indicating the amount of revenue generated by the corporations and operators in the field, the total includes a large element of duplication: often the products of one industry become the materials of other industries. The net value of production obtained by deducting the cost of materials, fuel and electricity is a more accurate measure of the contribution to the national economy.

The value of agricultural production includes forest production on farmers' wood lots. As such products are also reported under forestry, the amount of duplication is deducted.

A survey of production must differentiate between the more important branches and at the same time present a grand total that will be free from over-lapping. For example, the products of pulp and paper mills and sawmills are included in forestry production as being the first finished products of commercial value resulting from the productive process. They may, however, be classified under manufactures in view of the nature of the production process. The production of such industries is regarded both as primary and secondary, but the duplication eliminated from the grand total.
